

Smart grids

PV-LOCAL

Photovoltaic self-consumption

Completed

Simulate photovoltaic generation and electricity demand in a building.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym

PV-LOCAL

Launch year

2023

Duration

36 months

Total budget

1.5 MMAD

Hosting platform

Grid experimentation platform

Contact

Project coordination — contact@iresen.ma

Consortium

Academic research

Engineering and testing

Technology partner

Scientific objectives

- Analyse generation, consumption and self-consumption profiles.
- Test control strategies suited to grid constraints.
- Compare flexibility and power-quality indicators.
