
Solar thermal

THERM-IND

Solar heat for a pilot process

Completed

Study solar heat in a simulated industrial process.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym

THERM-IND

Launch year

2022

Duration

18 months

Total budget

2.5 MMAD

Hosting platform

Solar thermal testing platform

Contact

Project coordination — contact@iresen.ma

Consortium

Academic research

Engineering and testing

Technology partner

Scientific objectives

- Characterise solar capture and heat storage.
- Compare performance across load profiles and climatic conditions.
- Assess the stability of energy supply and opportunities for optimisation.
