

Solar photovoltaics

PV-FORECAST

Solar generation forecasting

Completed

Test forecasting models on synthetic photovoltaic series.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym

PV-FORECAST

Launch year

2026

Duration

30 months

Total budget

3.5 MMAD

Hosting platform

Photovoltaic testing platform

Contact

Project coordination — contact@iresen.ma

Consortium

Academic research

Engineering and testing

Technology partner

Scientific objectives

- Characterise photovoltaic materials and components.
- Measure electrical performance under different test conditions.
- Identify degradation factors and opportunities for improvement.
