

Wind energy

VENT-LOCAL

Small wind turbine for local uses

Upcoming

Study small turbine design and testing for decentralised uses.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym

VENT-LOCAL

Launch year

2022

Duration

36 months

Total budget

3.5 MMAD

Hosting platform

Wind testing platform

Contact

Project coordination — contact@iresen.ma

Consortium

Academic research

Engineering and testing

Technology partner

Scientific objectives

- Characterise wind resources and operating conditions.
- Compare turbine configurations and their performance.
- Assess maintenance constraints and opportunities for local adaptation.
