Smart grids

PV-LOCAL

Photovoltaic self-consumption

Completed

Simulate photovoltaic generation and electricity demand in a building.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
PV-LOCAL

Launch year
2023

Duration
36 months

Total budget
1.5 MMAD

Hosting platform
Grid experimentation platform

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Analyse generation, consumption and self-consumption profiles.
- Test control strategies suited to grid constraints.
- Compare flexibility and power-quality indicators.
