Energy efficiency

HABITAT-SOL

Thermal comfort in a pilot dwelling

Ongoing

Compare insulation and solar cooling in an experimental dwelling.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
HABITAT-SOL

Launch year
2025

Duration
30 months

Total budget
2.5 MMAD

Hosting platform
Energy testing platform

Consortium

Atlas Lab · Solis R&D · Nova Tech

Scientific objectives

- Measure energy demand and operating conditions.
- Compare solutions for demand reduction and thermal comfort.
- Assess performance through reproducible tests.
