Green hydrogen

# H2-FLEX

## Photovoltaic-coupled electrolysis

Ongoing

Model an electrolyser powered by variable solar generation.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
**H2-FLEX**

Launch year
**2023**

Duration
**18 months**

Total budget
**4 MMAD**

Hosting platform
**Hydrogen experimentation platform**

Contact
**Prof. Lina Idrissi — Atlas Lab — contact@iresen.ma**

## Consortium

Atlas Lab · Solis R&D · Nova Tech

## Scientific objectives

- Characterise renewable hydrogen production parameters.
- Compare electricity, water and storage integration conditions.
- Assess system performance and operating constraints.
