Smart grids

GRID-FLEX

Microgrid flexibility

Upcoming

Simulate the balance of renewable generation, storage and demand.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
GRID-FLEX

Launch year
2025

Duration
24 months

Total budget
1.5 MMAD

Hosting platform
Grid experimentation platform

Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab · Solis R&D · Nova Tech

Scientific objectives

- Analyse generation, consumption and self-consumption profiles.
- Test control strategies suited to grid constraints.
- Compare flexibility and power-quality indicators.
