Wind energy

VENT-DATA

Wind resource observation

Upcoming

Test wind time-series analysis for experimental sizing.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
VENT-DATA

Launch year
2023

Duration
30 months

Total budget
3 MMAD

Hosting platform
Wind testing platform

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise wind resources and operating conditions.
- Compare turbine configurations and their performance.
- Assess maintenance constraints and opportunities for local adaptation.
