Smart grids

SMART-DEMAND

Electricity demand control

Upcoming

Compare load-shifting scenarios against solar availability.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
SMART-DEMAND

Launch year
2024

Duration
36 months

Total budget
2.5 MMAD

Hosting platform
Grid experimentation platform

Contact
Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab · Solis R&D · Nova Tech

Scientific objectives

- Analyse generation, consumption and self-consumption profiles.
- Test control strategies suited to grid constraints.
- Compare flexibility and power-quality indicators.
