Solar photovoltaics

PV-FORECAST

Solar generation forecasting

Completed

Test forecasting models on synthetic photovoltaic series.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
PV-FORECAST

Launch year
2026

Duration
30 months

Total budget
3.5 MMAD

Hosting platform
Photovoltaic testing platform

Contact
Prof. Yassine Amrani — Solis R&D — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise photovoltaic materials and components.
- Measure electrical performance under different test conditions.
- Identify degradation factors and opportunities for improvement.
