Energy efficiency

FROID-SOL

Cooling with solar heat

Upcoming

Explore a cooling system powered by a solar thermal field.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
FROID-SOL

Launch year
2024

Duration
18 months

Total budget
2 MMAD

Hosting platform
Energy testing platform

Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Measure energy demand and operating conditions.
- Compare solutions for demand reduction and thermal comfort.
- Assess performance through reproducible tests.
