Wind energy

VENT-LOCAL

Small wind turbine for local uses

Upcoming

Study small turbine design and testing for decentralised uses.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
VENT-LOCAL

Launch year
2022

Duration
36 months

Total budget
3.5 MMAD

Hosting platform
Wind testing platform

Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise wind resources and operating conditions.
- Compare turbine configurations and their performance.
- Assess maintenance constraints and opportunities for local adaptation.
