Energy efficiency

FROID-PILOT

Cold-room energy control

Upcoming

Explore energy-saving controls for a cold-room demonstrator.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
FROID-PILOT

Launch year
2026

Duration
18 months

Total budget
1 MMAD

Hosting platform
Energy testing platform

Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Measure energy demand and operating conditions.
- Compare solutions for demand reduction and thermal comfort.
- Assess performance through reproducible tests.
