Wind energy

VENT-CONTROL

Small turbine control

Completed

Simulate control strategies to stabilise wind generation.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
VENT-CONTROL

Launch year
2023

Duration
24 months

Total budget
2 MMAD

Hosting platform
Wind testing platform

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise wind resources and operating conditions.
- Compare turbine configurations and their performance.
- Assess maintenance constraints and opportunities for local adaptation.
