Solar thermal

SOL-WATER

Solar heat and water treatment

Upcoming

Model solar heat in a water treatment process.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
SOL-WATER

Launch year
2022

Duration
24 months

Total budget
4 MMAD

Hosting platform
Solar thermal testing platform

Contact
Prof. Salma Naciri — Nova Tech — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise solar capture and heat storage.
- Compare performance across load profiles and climatic conditions.
- Assess the stability of energy supply and opportunities for optimisation.
