Energy storage

BAT-REUSE

Experimental battery reuse

Completed

Explore sorting and second-life criteria for simulated batteries.

The approach combines modelling, test preparation and measurement analysis. Results from the different configurations will be compared using project-specific indicators to document operating limits and opportunities for improvement.

Acronym
BAT-REUSE

Launch year
2024

Duration
18 months

Total budget
1.5 MMAD

Hosting platform
Storage testing platform

Prof. Yassine Amrani — Solis R&D — contact@iresen.ma

Consortium

Atlas Lab | Solis R&D | Nova Tech

Scientific objectives

- Characterise storage-system performance and ageing.
- Test different charge and discharge cycles.
- Compare control strategies across energy uses.
